

Simplified Workflow with SAP FIORI

Simplify your world through amazing design

Background

SAP Fiori UX is the new face of SAP to business users in all lines of business across devices and deployment options. It provides optimal usability for simplified business interactions and ease of use. The most recent delivery of SAP Fiori includes 300+ apps for core transactional and analytical business functions, such as workflow approvals, information lookups, and self-service tasks.

The apps offer the user the ability to conduct transactions (transactional apps), get insight and take action (analytical apps), view factsheets and contextual information (factsheet apps) and finally, they have the ability to analyze and evaluate strategic or operational KPIs (SAP Smart Business Cockpits).

Business Benefits

- Carry out your SAP Business suite tasks on any device
- Get a modern look and feel of your standard SAP transactions, and optimize business processes
- Get the most out of your SAP business suite investment

Key Features

- SAP Fiori Launchpad provides a web-based entry point for SAP business applications.
- Fiori is a role based, personalized, real-time and contextual aggregation point for business applications and analytics.
- It runs on multiple devices, using the responsive design paradigm, and is deployable on multiple platforms.
- It is designed according to the simple and intuitive SAP Fiori user experience, while supporting established UI technologies.

About 2BM

2BM is one of the leading consultancies within Enterprise Mobility and SAP HCM in the Nordic region. We are an innovative and business-oriented consulting and software company offering competent and dedicated people with insight in tomorrow's solutions and technology.

The company focuses on the development and implementation of mobile solutions for enterprises and develops and implements innovative mobile solutions using back-end and mobile device-independent Enterprise Mobility platforms.
