

2BM Mobile Maintenance

OPTIMIZED WORK ROUTINES & INCREASED DATA ACCURACY

Background

The 2bm Mobile Maintenance is an iPad application built on the SAP Mobile Platform. Initially developed for a major Danish rail infrastructure company, the application supports maintenance workers in the execution of Inspection Orders. The application increases the speed, ease and accuracy with which maintenance tasks are performed.

Business Benefits

- Accuracy in registrations
- Optimization of daily work routines
- Reduced transportation times
- Minimized paper usage
- Improved reaction time
- Faster communication

Key Features

- Work Order Overview - view information on when and where workorders should be executed
- Task Editing - view detailed information on tasks, confirm tasks and take measurements
- Create Notifications - fill in information about and take pictures of errors and flaws
- Locate Equipment - GPS integration showing technical objects in the vicinity of the user
- Submitting - all changes are stored locally and synchronized when possible.

About 2BM

2BM is one of the leading consultancies within Enterprise Mobility and SAP HCM in the Nordic region. We are an innovative and business-oriented consulting and software company offering competent and dedicated people with insight in tomorrow's solutions and technology.

The company focuses on the development and implementation of mobile solutions for enterprises and develops and implements innovative mobile solutions using back-end and mobile device-independent Enterprise Mobility platforms.

2BM is also a full service provider within Human Capital Management, delivering customizable solutions such as: SAP HCM and SuccessFactors implementations, Payroll outsourcing and Talent Management Consulting.

Our vision is to be the leading company within the creation and operation of the future workplace and processes, by bringing tomorrow's solutions and technology into today's workforce and thus evolving the way of doing business"
