

## Device, Apps & Content Management

---

Get the best out of your mobile device fleet and ensure security

### Background

---

You probably already have several tablets and smartphones in your organization, and employees are already using either their own or a corporate devices to check their emails and calendars. Maybe some of your employees even download and edit business documents. But how do you make sure that the data and devices are secure? Maybe you are already doing mobile app development, but how do you distribute the apps to the mobile devices, and control the app lifecycle?

With SAP Mobile Secure you go beyond securing and managing your company's mobile devices, apps and content. SAP Mobile Secure is an integrated, cloud-based enterprise mobility management portfolio with superior user experiences for all. It is running in minutes, even when establishing the most detailed device or app-level policies. End users delight in a consumer-grade solution that removes complexity, promotes collaboration and enables discovery.

### Business Benefits

---

- **Mobile Device Management** – SAP Mobile Secure is the trusted solution to manage and enable security, compliance and settings of mobile devices for companies of all sizes.
- **Mobile Application Management** – SAP Mobile Secure cloud edition allows you to manage and secure applications on your devices. Mobile Place is the end user portal for SAP Mobile Secure. It provides a single interface into the Enterprise Mobility Management environment for both managed and unmanaged users and devices.
- **Mobile Content Management** – SAP Mobile Documents are designed for enterprise deployments where collaboration, security and control of business content are critical. Users enjoy anytime and anywhere access to view and collaborate on personal and corporate content in an easy-to-use native mobile app

### Key Features

---

- Quickly self-enroll devices for enterprise use with preconfiguring settings, and enforcing security and compliance policies.
  - Use built-in robust analytics for instant insight into mobile device usage and the ability to take immediate action
  - Accelerate mobile initiatives by automating app security via App Wrapping. App Wrapping technology enables enterprises to quickly secure existing corporate and thirdparty applications without having to write any code.
